Manage compliance and calibration requirements more efficiently with EOS Advisor.

Are you relying on pen and paper to manage compliance? Do you worry that you won't be able to find records during an audit? Is it expensive and time-consuming to maintain?

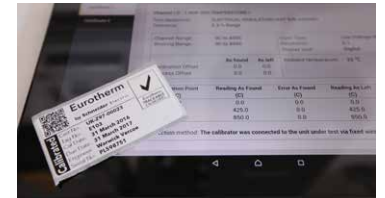

Access compliance status and certificates at site, plant, area, and instrument levels from anywhere in the world.

We have great news: That's all about to change.

Seamlessly transform your equipment data into useful, actionable, and auditable information with our revolutionary software as a service, called Eurotherm™ Online Services (EOS) by Schneider Electric™. EOS Advisor allows you to manage your equipment and staff more efficiently with one integrated system that meets all your compliance requirements. And the EOS tablet application for calibration (eCAT™) improves the consistency of your calibration process.

Here's how it works

With EOS, an instrument test produces a certificate and QR label.

Just scan the label for an instant view. Why not try it yourself?

Check all scheduled activities easily on the planning page.

Finally, maintain quality with a simple, streamlined digital solution.

Improve the efficiency of your calibration process with a secure, mobile-compatible tool that eliminates the drawbacks of a paper-based system. Simply rely on our automated, digitized process to streamline and connect your data. You'll enjoy easy retrieval when and where you need it — and get an approved certificate on the same day of calibration.

Increase equipment efficiency

- Check compliance status overview anywhere, at any time
- Review historical and current status for future planning
- Get instant access to certificates at instrument using QR code

Establish robust universal workflow

- Plan, schedule, and deploy calibration automatically
- Configure workflows for capture, validation, correction, and approval

Reduce risk of human error

- Eradicate error-prone paper and Microsoft® Excel®-based processes
- eCAT tablet App aids repeatable, accurate, calibration to industry standards (ISO17025, AMS2750E, and GAMP)

Simplify your searches

- Get real-time status reports across multiple sites
- View data and retrieve documents by context — plant, site, equipment, instrument, channel
- Avoid unplanned downtime searching for compliance documents with instant status

"With our old manual process limitations, I was concerned we'd lose our accreditation. Now I never worry about finding the right records when I need them." — Leading aerospace manufacturer, Quality Manager

Experience the next generation of data management with a three-month trial.

Now you can efficiently manage compliance requirements and enjoy instant online access to your data — affordably and reliably.

Reduce operational costs

- Pay as you go with a subscription that grows with your business needs
- Eliminate ongoing maintenance costs — no hardware or software installation means no updates or patches to worry about

Rest assured it's all secure

- Entrust your data to secure long-term cloud service and storage (50+ years) for audit and compliance
- Rely on service that meets our Secure Development Life Cycle standard for cybersecurity

EOS Advisor applications leverage technology developed for Industrial Internet of Things and Industry 4.0 applications. These technologies improve cost efficiencies, enable predictive maintenance, and result in competitive advantage. Unlike many other technology solutions that require a "rip-and-replace" mentality — these solutions are a natural fit to an existing process setup and the technology easily wraps around current installations.

EOS Advisor is ideal for these industries and applications:

Heat Treatment

- Aerospace
- Automotive
- Furnaces
- Test equipment

Food & Beverage

- Sterilization
- Cooking
- Drying systems
- Ovens

Life Sciences

- Batch processes
- Production

Healthcare

- Sterilization
- Disinfection cycles
